## SPECIFICATIONS OF THE SUIT :

### **RDS orange Gore-Tex Rapid Donning Suit SIZE XL**

- Visibility carried out in a striking colour and provided with reflective strips on back, shoulders, thighs and arms (see the pictures)
- Suit made of Gore Tex Pazifik material
- **Neoprene gloves 5mm with Kevlar palm size XL** attached in the pockets on the arms (We'll send you the Bare K-palm gloves)
- **Neoprene HD boots size 45** attached on the suit
- **No wind hood attached** but with a **separate 3mm neoprene hood**
- **Waterproof and buoyancy of at least 70N.** Buoyancy must be maintained if the suit gets a leak.
- **Integrated removable insulation layer with floating panels** of at least 0,83Clo.
- **Extra attachment point for small material** (a D-ring on the chest) (see the details below under POCKET D-RING))
- **YKK Front zip that closes in one direction.** (See the details below under ZIPPER) from bottom to top direction = closing the zipper
- **2 Pockets on the chest** = 170 mm x 200 mm (See front view picture)
- **Pockets on the thigh** = 190 x 270mm One pocket has a carabiner hook of about 6cm inside the pocket
- **Reinforcements on but and knees are Cordura**, other reinforcements are Melco
- **Delivered with separate pair of ice spikes** ( see the details below under SPIKES )
- All certificates (SOLAS, CE...) are this way valid on the suit
- **Fixing point for carabiner** = an attached belt around the torso at nipple height with on one end a O-ring, on the other end a carabiner. This way the belt can be closed. The belt can be adapted to the size of the diver like as a BCD chest belt. (See the details below under CHEST BELT)
- Undergarment attaches to the suit by means of "**stretch loops**" on **arms, legs and neck** and with a zipper at the height of the torso. the loops on the undergarment closes with a press-button. (See the details below under UNDERGARMENT)

## DETAILS OF THE SPECS!

### D-RING ON THE POCKET
